

PROGRAM EDUCATIONAL OBJECTIVES (PEO)

PEO1

Land surveyors who are knowledgeable and technically competent in solving problem for career building in geomatics or geospatial-based industry.

PEO2

Land surveyors who demonstrate effective communication, managerial, entrepreneurial, digital and numerical skills in dealing with geomatics related issues.

PEO3

Land surveyors who practice work ethics, social skills and able to work collectively in decision making process that affect geomatics industry and society locally and globally.

PEO4

Land surveyors who conduct a good leadership, adapt information management and engage lifelong learning in geomatics industry.

CFAP220

PROGRAMME LEARNING OUTCOMES (PLO)

CFAP220

Apply knowledge and understanding on surveying principle and technology in geomatics field

PL01

Derive innovative solutions in geomatics problems through scientific reasoning

PL02

Demonstrates competencies in practicing surveying skills in geomatics projects

PL03

Demonstrate social skills, teamwork and empathy towards the society locally and globally

PL04

Practice effective oral and written communication

PL05

Perform wide range of suitable digital technologies and appropriate software to address geomatics related issues

PL06

Explain numerical data to support geomatics related issues

PL07

Display good leadership qualities in performing projects

PL08

Practice lifelong learning through continuous professional development

PL09

Display good managerial and entrepreneurial skills

PL010

Display professional code of conduct and work ethics

PL011
